DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 2-14, 16, 17, 19 and 20 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 15 and 18 recite the terms "preferably consisting of" which renders the claims indefinite. This recitation conveys the meaning that other types of units may also be present. The term "preferably" should either be removed or the claim has to be reworded to clearly convey

Art Unit: 1623

what is being claimed. The claims also have limitations appearing within parentheses. It is not clear if these limitations are part of the claim or not. If they are part of the claim the parentheses should be removed.

Claims 2-14, 16, 17, 19 and 20 provide for the use of pharmaceutical compositions, but, since the claims do not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 21 is rendered indefinite since it depends from claim 15, which is indefinite.

Jozefonvicz, J. et al (Carbohydrate Polymers, 1997, 32, 89-93) and Jozefonvicz, J. et al (Carbohydrate Polymers, 1995, 28, 145-152) drawn to dextran derivatives of formula CMDSu and CMDBS and the synergistic role of benzylamide and sulfate derivatives are considered to be pertinent and may be used as prior art in rejection.
